FLUXLABS

WALL POSTER · PASSWORDS

Passphrases beat passwords.

Long and easy to remember is stronger than short and complicated.

WEAK

Summer2026!

Short and guessable. Cracked in minutes.

STRONG

lantern-pickle-harbor-violet

Four random words. Easy to type, hard to crack.

1 **Use four random words.**
Not a song lyric or a saying. Random words that don't belong together.

2 **One passphrase per account.**
When one site leaks, the others stay safe.

3 **Let a password manager remember them.**
You learn one strong passphrase. It keeps the rest.

4 **Change it only when there's a reason.**
A leak, a share or a strange sign-in. Not just because a month went by.

Was your password in a leak?

Check it for free at **fluxlabs.net/password-breach-check**. Your password never leaves your computer.
