FLUXLABS

WALL POSTER · EMAIL SAFETY

Think before you click.

Most break-ins start with one email. Learn the five signs.

1. **It's in a hurry.**
   "Act now" or "your account closes today". Rushing you is the whole point.

2. **It's too scary or too good.**
   A legal threat, a missed payment, a refund or a prize. Strong feelings skip checks.

3. **The sender looks a little off.**
   A name you know with an address you don't, or spellings like rnicrosoft.com.

4. **A link or file you didn't expect.**
   An invoice, shared file or voicemail you weren't waiting for. Call the sender first.

5. **It wants you to sign in, pay or share.**
   Passwords, codes, bank details or gift cards. Go to the site yourself, not the link.

Not sure? Don't click.

Forward it to **check@scan.fluxlabs.net** for a free verdict, or call your IT support. Speaking up fast about a mistake is always the right call.
